TERM PROJECT

2025.11.25

Speaker: Hong-Han Shuai

ECE, NYCU

TERM PROJECT - GROUPS

- Up to 3 members
  - Groups with 1 or 2 members are also great

- A group with more members is expected to perform better

TERM PROJECT PROPOSAL

- Term Project Proposal (**due 12/2 23:59**)
  - A 2-page document describing your:
    - Idea
    - Application
    - **Modules used (at least 2)**
    - Dataset
    - Members (一組一份就好)
  - Your research topic is a good candidate (show the new part)
  - Show that your ideas are novel and interesting, and worth efforts
- Each member contributes
  - You'll be asked to hand in a contribution list to summarize the contribution of each member

Week	Date	Contents
1	9/2	Lecture 1: Class Overview and Unsupervised Learning (HW#1)
2	9/9	Lecture 2: Traditional Classification-Part 1
3	9/16	Lecture 3: Traditional Classification-Part 2
4	9/23	Lecture 4: Neural Networks Basics (HW#2)
5	9/30	Hands-on Tutorials on PyTorch
6	10/7	Lecture 5: Deep Learning in Practice
7	10/14	Lecture 6: Introduction to Natural Language Processing
8	10/21	Midterm
9	10/28	Lecture 6: Introduction to Natural Language Processing
10	11/4	Lecture 7: Deep Learning for NLP+Hands-on Tutorials on NLP (HW#3)
11	11/11	Lecture 8: Introduction to Computer Vision
12	11/18	Lecture 9: Advanced Computer Vision
13	11/25	Lecture 10: Object Detection and Image Segmentation] Hands-on Tutorials on Object Detection (HW#4/Final Project proposal)
14	12/2	Self-Supervised Learning
15	12/9	Graph Neural Networks Processing (HW#5)
16	12/16	Reinforcement Learning

GRADING POLICY

- Presentation: 60%
- Report: 40%

Motivation

Problem formulation

Proposed Model

Experimental Results

Conclusions

Teamwork Assignment (if applicable)
